

By signing this contract, Arval Netherlands, with its headquarters at Houten, the Netherlands, proves itself a frontrunner in procurement of far more fuel-efficient cars, thus contributing to passenger car CO₂-reductions beyond what is legally required by European law.

Stichting Natuur en Milieu, represented by Maarten van Biezen, teammanager, on behalf of the European Cleaner Car Contracts project group, is pleased to welcome Arval Netherlands to the European Cleaner Car Contracts programme.

Arval Netherlands, represented by Dick Bakker, commercial director, joins the Cleaner Car Contracts programme from the Netherlands. Arval Netherlands pledges to improve the fuel-efficiency of its passenger fleet. To this end, Arval Netherlands will strive to reduce the fleet average CO₂-emissions of its newly acquired fleet of 2012 to 119 grams of CO₂ per kilometre (gr CO₂/km). Arval Netherlands is therefore awarded the Cleaner Car Contracts Gold Fleet status.

GOLD FLEET

CLEANER CAR CONTRACTS

Both parties adhere to the requirements listed in the Annex.
