

By signing this contract, MKB Lease, with its headquarters at Amersfoort, the Netherlands, proves itself a frontrunner in procurement of far more fuel-efficient cars, thus contributing to passenger car CO₂-reductions beyond what is legally required by European law.

Stichting Natuur & Milieu, represented by Tjerk Wagenaar, director, on behalf of the European Cleaner Car Contracts project group, is pleased to welcome MKB Lease to the European Cleaner Car Contracts programme.

MKB Lease, represented by A. J. A. Overbeeke, general director, joins the Cleaner Car Contracts programme from the Netherlands. MKB Lease pledges to improve the fuel-efficiency of its passenger fleet. To this end, MKB Lease will strive to reduce the fleet average CO₂-emissions of its newly acquired fleet of 2014 to 114 grams of CO₂ per kilometre (gr CO₂/km). MKB Lease is therefore awarded the Cleaner Car Contracts Gold Fleet status.

Both parties adhere to the requirements listed in the Annex.
